

HVDI Shared File Server Storage

Our Shared File Storage replaces the traditional on premise File Server and provides your business with a centralised, secure, and scalable storage solution that is easily accessible from within your Hosted Virtual Desktop and Virtual Server environment.

Our optional Shared File Storage allows your employees to share files and documents across your hosted desktop environment by providing secure and scalable storage conveniently available in 10GB or 100 GB increments. The advanced management features of the Management Suite further allow you to administer user permissions and access to those files.

Key Features

- Centralised Storage
- Access from Anywhere
- Scalable
- Secure
- Document Collaboration
- Easy Access
- Daily Backups
- Web Dav option (for Mac)

Access from Anywhere

With flexible working becoming ever more common, business are now looking for ways to enable employees to work remotely as well as collaboratively. Our Shared File Storage bolts on to your existing Hosted Virtual Desktop environment giving users the ability to create and share documents without the need of additional virtual servers. It is simply presented to all HVD users with as an easily accessible mapped drive where they can create, modify, and delete files and folders. We can also provide you with the capability to manage file and folder permissions by subscribing to our Management Suite.

Centralised

Our Shared File Storage is easily accessible through a network share that is automatically mapped to your Hosted Virtual Desktop. This presents a single, centralised storage area, accessible to all users within your HVD environment.

Secure

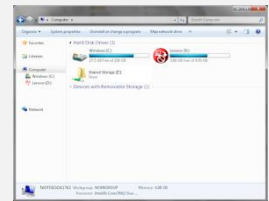

All data is held in our secure, tier 3, UK data centres. In addition to comprehensive physical security measures, our networks provide fully redundant network links and equipment to provide you with an impressive 99.99% Service Level Agreement. All Shared Storage is backed up every 24 hours and is retained for a 14 day period.

Scalable

Our Shared File Storage solution is available in 10GB increments and can be easily upgraded or downgraded instantly using our customer Control Panel.

Why do I need it?

Our Shared File Storage enables HVD users to actively share and collaborate on files stored in an easily accessible centralised location. This is the equivalent of your "office file server" and offers many advantages over the on-premise file server such as being accessible from any location, scalable, and secure.

Enjoy easy access to secure, centralised Shared File Storage mapped directly to your Hosted Desktop...
